

Empirical studies in COST TU1305

Two empirical studies that have been carried out within the Action:

- A quantitative study based on a web-based survey developed within the working groups regarding *“Social Networks, Social Media usage and Travel Behaviour among students in EU countries”*. The survey was distributed at 23 universities in 20 countries in different languages. The analysis of the 8250 responses is currently in progress.
- A qualitative study based on the qualitative method developed within the working group. The study includes 20 in-depth interviews from 6 countries, and the analysis of the interviews is in progress as well.

The outcomes of these studies generated several publications in high ranked journals. A technical report based on the quantitative survey, proposing ways to collect travel behaviour data, will be published as well.
